

PacStar EITS

Federal Enterprise IT Solutions

Curtiss-Wright is a leading provider of advanced technical solutions to our military and government customers worldwide. PacStar holds our own GSA schedule and we are an authorized teaming agent for a variety of network equipment and software manufacturers, allowing us to supply federal agencies with top quality communications products and services at competitive prices. Our global presence ensures clients can count on our technical team to provide an immediate personal response with innovative solutions that meet their complex communications requirements.

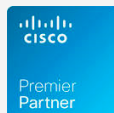

Curtiss-Wright specializes in advanced communications products, network design and implementation of secure wireless, VoIP / video and switching, routing and computing solutions. Our engineers are fully trained and hold professional-level certifications for our major product lines including Aruba, Cisco, Extreme Networks, Riverbed, Palo Alto, Haivision and more. In addition, we provide professional services to ensure your network and communications implementation success, including design, engineering, integration, test, training and project management.
