

Bring New Stability to Payloads in Motion

Stabilize the movements of payloads on the ground and in the air with rugged, high-precision, and scalable motion control systems from Curtiss-Wright Defense Solutions in Neuhausen, Switzerland.

Get Exactly What is Needed

Deploy highly reliable, fully integrated motion control systems uniquely tailored to meet application requirements on time and on budget.

To Accelerate Time to Market

Motion control systems leverage a modular suite of rugged and field-proven components, using a building-block approach and advanced processes to jump-start system development and reduce risks.

And Stabilize Almost any Payload

Motion control systems can be adapted to and configured for almost any application to tackle the toughest motion control challenges.

In any Environment

Take high-precision motion control to the harshest environments. Thorough testing of every component in every system ensures reliable and accurate performance in the most severe conditions.

With Complete Confidence

Rely on a trusted, proven leader in high-precision motion control systems. **Curtiss-Wright.**

Trusted. Proven. Leader.

Find out how to bring the highest possible degree of motion control and stability to your applications.
